I. What aspects of the teaching or content of this course do you feel were especially good?

The class has good projects.
Team oriented work simulates real world.

II. What changes could be made to improve the teaching or the content of this course?

Having a final worth most of the class points is kind of unreasonable, especially since the test is written and not ^{MS} project related for the most part.

I. What aspects of the teaching or content of this course do you feel were especially good?

This class is a great utilization of what I call the "hard sciences" where specific skills using technology are taught. I think this class is very helpful and those skills can be applied directly to the real world. Scott was a great teacher and was very helpful.

II. What changes could be made to improve the teaching or the content of this course?

I. What aspects of the teaching or content of this course do you feel were especially good?

- I really liked the videos he would post on Blackboard for the labs. It was so helpful to be able to see the steps before doing it on my own.
- probably the best, most organized, and most useful Blackboard site of any course I've had.

II. What changes could be made to improve the teaching or the content of this course?

Nothing! Scott was the best professor I've had in the MBA program. I REALLY enjoyed the course. He's a very effective teacher and always willing to help students. I can't say better things about him. I'd recommend this class to anyone.

I. What aspects of the teaching or content of this course do you feel were especially good?

He taught very clearly, I feel like I understand how to use Microsoft Project very well now.

I think the video conference session went well.

II. What changes could be made to improve the teaching or the content of this course?

I think it was difficult to pay attention in class when everyone was trying to copy down notes + type them. I'm not sure if there is a better way to do this, but ~~if~~ I think I could have learned more if I sat and listened, rather than frantically taking notes.

I think Project Beta and the Final Project were very similar, it would have been more challenging if they were different.

I. What aspects of the teaching or content of this course do you feel were especially good?

The use of technology was great, and going over examples in class to make sure all the material was absorbed. The labs do a great job of guiding us through the material to make sure it is all comprehended.

II. What changes could be made to improve the teaching or the content of this course?

A real world case study might be interesting or useful.
